

1 Abstract:

2

3 The invention relates to a watch (1), in particular a wrist  
4 watch, comprising a housing (2) with a display (3) and an inter-  
5 face (4) capable of being connected to an integrated electronic  
6 circuit(5). To provide a watch (1) with which various functions,  
7 in particular also cashless payment transactions, are made pos-  
8 sible, a receptacle (6) for the integrated electronic circuit  
9 (5) designed as an exchangeable chip with contacts (7) arranged  
10 thereon is provided within the housing (2), the receptacle (6)  
11 having elements (8) for contacting the contacts (7) of the inte-  
12 grated electronic circuit (5) in its inserted position, wherein  
13 the contacting elements (8) are connected to the interface (4)  
14 and to a device (9) for contactless transmission of data.
